

## Table of Contents

|  |   |      |
|--|---|------|
| CONTRIBUTORS TO VOLUME 383 . . . . .   |   | vii  |
| PREFACE . . . . .  |   | xi   |
| VOLUMES IN SERIES. . . . .   |   | xiii |
| <br>   |   |      |
| 1. Prediction of Protein Structure   | ROBERT H. KRETSINGER,<br>ROGER E. ISON, AND<br>SVEN HOVMÖLLER                     | 1    |
| 2. Modeling and Studying Proteins with<br>Molecular Dynamics   | ROBERT SCHLEIF  | 28   |
| 3. <i>Ab Initio</i> Protein Folding Using LINUS  | RAJGOPAL SRINIVASAN,<br>PATRICK J. FLEMING,<br>AND GEORGE D. ROSE                 | 48   |
| 4. Protein Structure Prediction Using Rosetta  | CAROL A. ROHL,<br>CHARLIE E. M. STRAUSS,<br>KIRA M. S. MISURA, AND<br>DAVID BAKER | 66   |
| 5. Poisson–Boltzmann Methods for<br>Biomolecular Electrostatics  | NATHAN A. BAKER   | 94   |
| 6. Atomic Simulations of Protein Folding, Using<br>the Replica Exchange Algorithm  | HUGH NYMEYER,<br>S. GNANAKARAN, AND<br>ANGEL E. GARCÍA                            | 119  |
| 7. DNA Microarray Time Series Analysis:<br>Automated Statistical Assessment of<br>Circadian Rhythms in Gene Expression<br>Patterning | MARTIN STRAUME  | 149  |
| 8. Molecular Simulations of Diffusion and<br>Association in Multimacromolecular<br>Systems   | ADRIAN H. ELCOCK  | 166  |

|                         |   |  |     |
|-------------------------|---|--|-----|
| 9.                      | Modeling Lipid–Sterol Bilayers: Applications to Structural Evolution, Lateral Diffusion, and Rafts                | MARTIN J. ZUCKERMANN,<br>JOHN H. IPSEN, LING MIAO,<br>OLE G. MOURITSEN,<br>MORTEN NIELSEN,<br>JAMES POLSON,<br>JENIFER THEWALT,<br>ILPO VATTULAINEN, AND<br>HONG ZHU | 198 |
| 10.                     | Idealization and Simulation of Single Ion Channel Data  | ANTONIUS M. J. VANDONGEN   | 229 |
| 11.                     | Statistical Error in Isothermal Titration Calorimetry   | JOEL TELLINGHUISEN   | 245 |
| 12.                     | Analysis of Circular Dichroism Data   | NORMA J. GREENFIELD  | 282 |
| 13.                     | Computation and Analysis of Protein Circular Dichroism Spectra  | NARASIMHA SREERAMA<br>AND ROBERT W. WOODY  | 318 |
| 14.                     | Model Comparison Methods  | JAY I. MYUNG AND<br>MARK A. PITT   | 351 |
| 15.                     | Practical Robust Fit of Enzyme Inhibition Data  | PETR KUZMIČ, CRAIG HILL,<br>AND JAMES W. JANC  | 366 |
| 16.                     | Measuring Period of Human Biological Clock: Infill Asymptotic Analysis of Harmonic Regression Parameter Estimates | EMERY N. BROWN, VICTOR<br>SOLO, YONG CHOE, AND<br>ZHENHUA ZHANG  | 382 |
| 17.                     | Bayesian Methods to Improve Sample Size Approximations  | CHRISTOPHER H. SCHMID,<br>JOSEPH C. CAPPELLERI, AND<br>JOSEPH LAU  | 406 |
| 18.                     | Distribution Functions from Moments and the Maximum-Entropy Method  | DOUGLAS POLAND   | 427 |
| AUTHOR INDEX . . . . .  |   |  | 467 |
| SUBJECT INDEX . . . . . |   |  | 485 |
